Dear Editor

I, the corresponding author of the manuscript, am enclosing herewith a paper for publication in **Journal of Law, Public Policies and Human Sciences** for possible evaluation.

With the submission of this manuscript, I would like to undertake that:

- All authors of this research paper have directly participated in the planning, execution, or analysis of this study;
- All authors of this paper have read and approved the final version submitted;
- The contents of this manuscript have not been copyrighted or published previously;
- The contents of this manuscript are not now under consideration for publication elsewhere;

- The contents of this manuscript will not be copyrighted, submitted, or published elsewhere, while acceptance by the Journal is under consideration;
- There are no directly related manuscripts or abstracts, published or unpublished, by any authors of this paper;
- My Institute's representative is fully aware of this submission.
- **ATTENTION: ETHICS COMMITTEE APPROVAL ON RESEARCH WITH HUMAN OR ANIMAL PARTICIPANTS**

Research on human participants, which includes identifiable human material or identifiable data, requires ethical protection. According to the **Declaration of Helsinki** issued by the World Medical Association, research on human participants should be clearly formulated in experimental protocols, and these should be submitted to independent ethical review boards (ethics committees and institutional review boards) for approval. Additionally, every potential participant should be informed about the "aims, methods, sources of funding, any possible conflicts of interest, institutional affiliations of the researcher, the anticipated benefits and potential risks of the study and the discomfort it may entail" and should give consent to participate.

Source: S Schroter, R Plowman, A Hutchings, A Gonzalez; Reporting ethics committee approval and patient consent by study design in five general medical journals. J Med Ethics 2006; 32:718–723. DOI: 10.1136/jme.2005.015115.

- **Authors are required to describe in their manuscripts ethics committee approval and participants consent by study design from participants when research involves human participants.**

Ethics approval must be sought for research involving human participants.

A 'participant' is someone who:

- Actively provides research data. For example:
 - ✓ Completes surveys
 - ✓ Participates in interviews, discussions or observations
 - ✓ Undergoes psychological, physiological or medical treatment or testing
 - ✓ tests software
 - ✓ Grants access to personal collections of records, photographs, etc.
 - ✓ Is the person from whom tissue has been collected (including blood, urine, saliva, hair)
 - ✓ Is identified in a record, e.g., employment record, medical record, education record, membership list, electoral roll or
 - ✓ Is identified or de-identified in data banks or unpublished human research data, e.g., analysis of existing unpublished data collected by another researcher or collected for a different research project.

- **Authors are required to describe in their manuscripts the Animal Ethics Committee approval when the study is carried out using animals.**

Animal Ethics Committees (AECs) provide avenues for public participation in the regulation of animal research. AECs are responsible for approving and monitoring research within Accredited Animal Research Establishments, including carrying out inspections of animals and facilities.

No animal research may be carried out without AEC approval. AECs must consider and evaluate applications to conduct research on the basis of the researchers' responses to a comprehensive set of questions, including their justification for the research, its likely impact on the animals, and procedures for preventing or alleviating pain and distress.

On behalf of the establishment, AECs have the power to stop inappropriate research and to discipline researchers by withdrawing their research approvals. They can require that adequate care, including emergency care, is provided for animals. They also provide guidance and support to researchers on matters relevant to animal welfare, through means such as the preparation of guidelines and dissemination of relevant scientific literature. AECs are responsible for advising establishments on the changes to physical facilities that should be made to provide for the needs of the animals used.

Does your research is based on human or animal participants?

(Select one option with a cross in the appropriate box)

YES:	NO:
------	-----

If YES, please provide the Animal Ethics Committee Approval Number or Ethics Committee Approval and patient consent by study design

.....

.....

Will you require a letter of acceptance?*

(Select one option with a cross in the appropriate box)

YES:	NO:
------	-----

* The acceptance letter is an **optional service** of the Journal. If the authors need a document to prove that their article has been peer-reviewed and accepted for publication, they may request, upon payment of an additional fee of USD 40, an acceptance letter for publication of the article.

NOTE 1: THE LETTER OF ACCEPTANCE may be issued **if, and only if**, the article has undergone a complete peer-review and is considered ACCEPTED for publication. Letters will NOT be issued for newly sent articles that have not yet been appropriately evaluated and peer-reviewed.

NOTE 2: The Journal does not agree with the trade-in documents that can attest to the publication of articles that have not gone through the due process of peer-review and are legitimately considered approved for publication in the subsequent edition.

NOTE 3: Bearing in mind that the pre-printing PDF is generally already considered as proof of publication, authors must, via e-mail, justify the request for a letter of acceptance for purposes of general registration by the Journal.

Will you require formatting services?

(Select one option with a cross in the appropriate box)

YES:	NO:
------	-----

This is an optional service. Not free of cost.
